

GROUP LACASSE BY AROLD HIP HOP SEATING

PALMER HAMILTON HIVE SEATING

HIVE FLEX SPACE

Modern technology has changed the way students learn, live, communicate, socialize and eat. It has taken the primary function out of space and allowed it to move into other spaces. Today's student spaces are required to serve multiple student activities, thus creating flex spaces. Hive bridges that space between classroom and dorm room, dorm room and cafeteria, cafeteria and learning, learning and lounging.

HIVE BOLD LOUNGE

Hive can be arranged into social and lounge areas. As your requirements change so can Hive. Because Hive is modular you can add additional seating or reduce the current footprint at any time.

HIVE POWER

Hive allows you to create collaborative, private, socializing, and teleconferencing spaces all in a relatively small area. You now have the freedom to create productive flex space areas that students love. Each unit contains an integrated internal power channel to bring as much power capacity you need and exactly where you need it. Power is available in 3, 5 and 7 wire systems.

HIVE BOLD RECEPTION

Accommodate any space with a contemporary look without sacrificing quality. Pictured is Hive with legs. Create your own area with Hive's endless options.
