SAFCO & VS STOOLS

The Hokki Stool by VS America is an ergonomic stool that transforms stationary sitting into an activity, ideal for active sitting environments. The stool is intended for temporary sitting such as reading circles or short-term computer work. The convex base allows for movement in all directions, which is critical to student development as physical movement increases both well-being and encourages the physical and intellectual maturing process.

GLOBAL TASK SEATING

GOAL is designed to give substantial upholstery and cushioning treatment to a product line consisting of task, operator, multi-tilter and tilter models. Select a task chair with height adjustable arms with self-skinned urethane armrests or go armless. For more function, consider the single lever operator control allowing adjustment of both seat and back angles.
