

EMBRACE

by the Bishop+Dates Collaborative

LOUNGE SEATING

carolina

+ Embrace

An offering designed to gracefully meet the demands of high traffic areas, utilizing familiar elements to create modern classics and timeless designs. Streamlined exposed wood details and simple stitch patterns lend refined sophistication offering comfort and style. Classic designs refined for modern applications. Well considered furniture created by interior designers to meet the demands of interior designers.

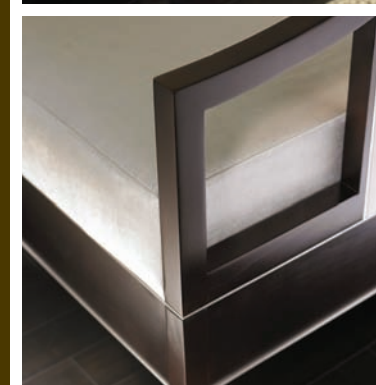

Embrace

Embrace is the result of Carolina's collaboration with two of the healthcare industries premier Interior Designers. With over 50 years of experience between them, Linda Bishop and Iris Dates set out to design a furniture collection that they long felt was lacking as an option to the healthcare design community. Furniture that combines high design with the details and function required for healthcare spaces. Classic designs refined for real world environments. Furniture that is timeless and sculptural in its contribution to the healing environment.

The two designer's unique perspectives bring an unprecedented level of experience and knowledge to the design of Embrace. Details and concerns that are often overlooked in products designed for healthcare applications are evidenced throughout Embrace. Wall protection, bumper rails, clean-outs, arm designs that allow easy exits, a slightly higher seat height for patient use, soft curves for comfort and generous seat widths for varying body types; all details found in the design of each Embrace offering. Couple these details with designs that echo a more corporate or residential style and the result is ideal for creating comforting, supportive healing environments.
