coordinated offerings & clean installations

Choose from any JSI edge offering to coordinate with media or storage walls, then further enhance by adding metal base trim to match your pull finish selection. Auvy provides maximum structural support with a lengthwise support beam that allows bases to be positioned over power and data connection points for clean installations. how to specify

Choose from maple, cherry or walnut veneer tops in rectangle, racetrack, AV or boat shapes from a variety of sizes. Then select an edge to match any JSI casegood series or select the style that best fits your specification needs. Options include power & data trough, a lighting kit and metal base accents.

power & data trough

1 trough (80" length)

2 troughs (48" length, each)

no trough

Repositional Bases Auvy bases may be repositioned along a beam that runs lengthwise beneath the table top in order to place them above electrical, data or audio-visual connections. **Power & Data** Auvy offers a sleek power & data trough that can be specified for easy access from any position at the table. 48" troughs have 2 power & data sections with a fixed white back painted section while the 80" trough has 3 power & data sections and 2 fixed white back painted sections. Troughs utilize standard 3-prong single circuit receptacles or can be hardwired. **Light** The optional LED lighting kit creates back lighting in the glass sections for worksurface visibility during presentations. **Base Trim** Optional metal accent rails for exterior bases can be specified in 3 finishes; silver, nickel or black. Accent rail finish matches power & data trough when specified together. **Edges** Choose from any standard JSI edge to coordinate with any casegood offering. **Wood** All wood finishes incorporate our proprietary low-emission finish; DuraTex. Paint colors may be applied to any vertical surface and are from the Sherwin-Williams® color wheel. Also, JSI offers special finishes and custom finish matching (contact JSI Customer Service for details).

Sustainability Learn how Auvy can contribute to your sustainability goals by contacting your JSI Customer Service Team.

duratex low-emission finish

To reduce hazardous emissions, we use a proprietary, specially designed top coat that offers exceptional hardness, abrasion and impact resistance while reducing hazardous or harmful gases. DuraTex significantly reduces hazardous emissions which helps to improve the quality of the indoor air we breathe.
