

# elite series

by Tablex

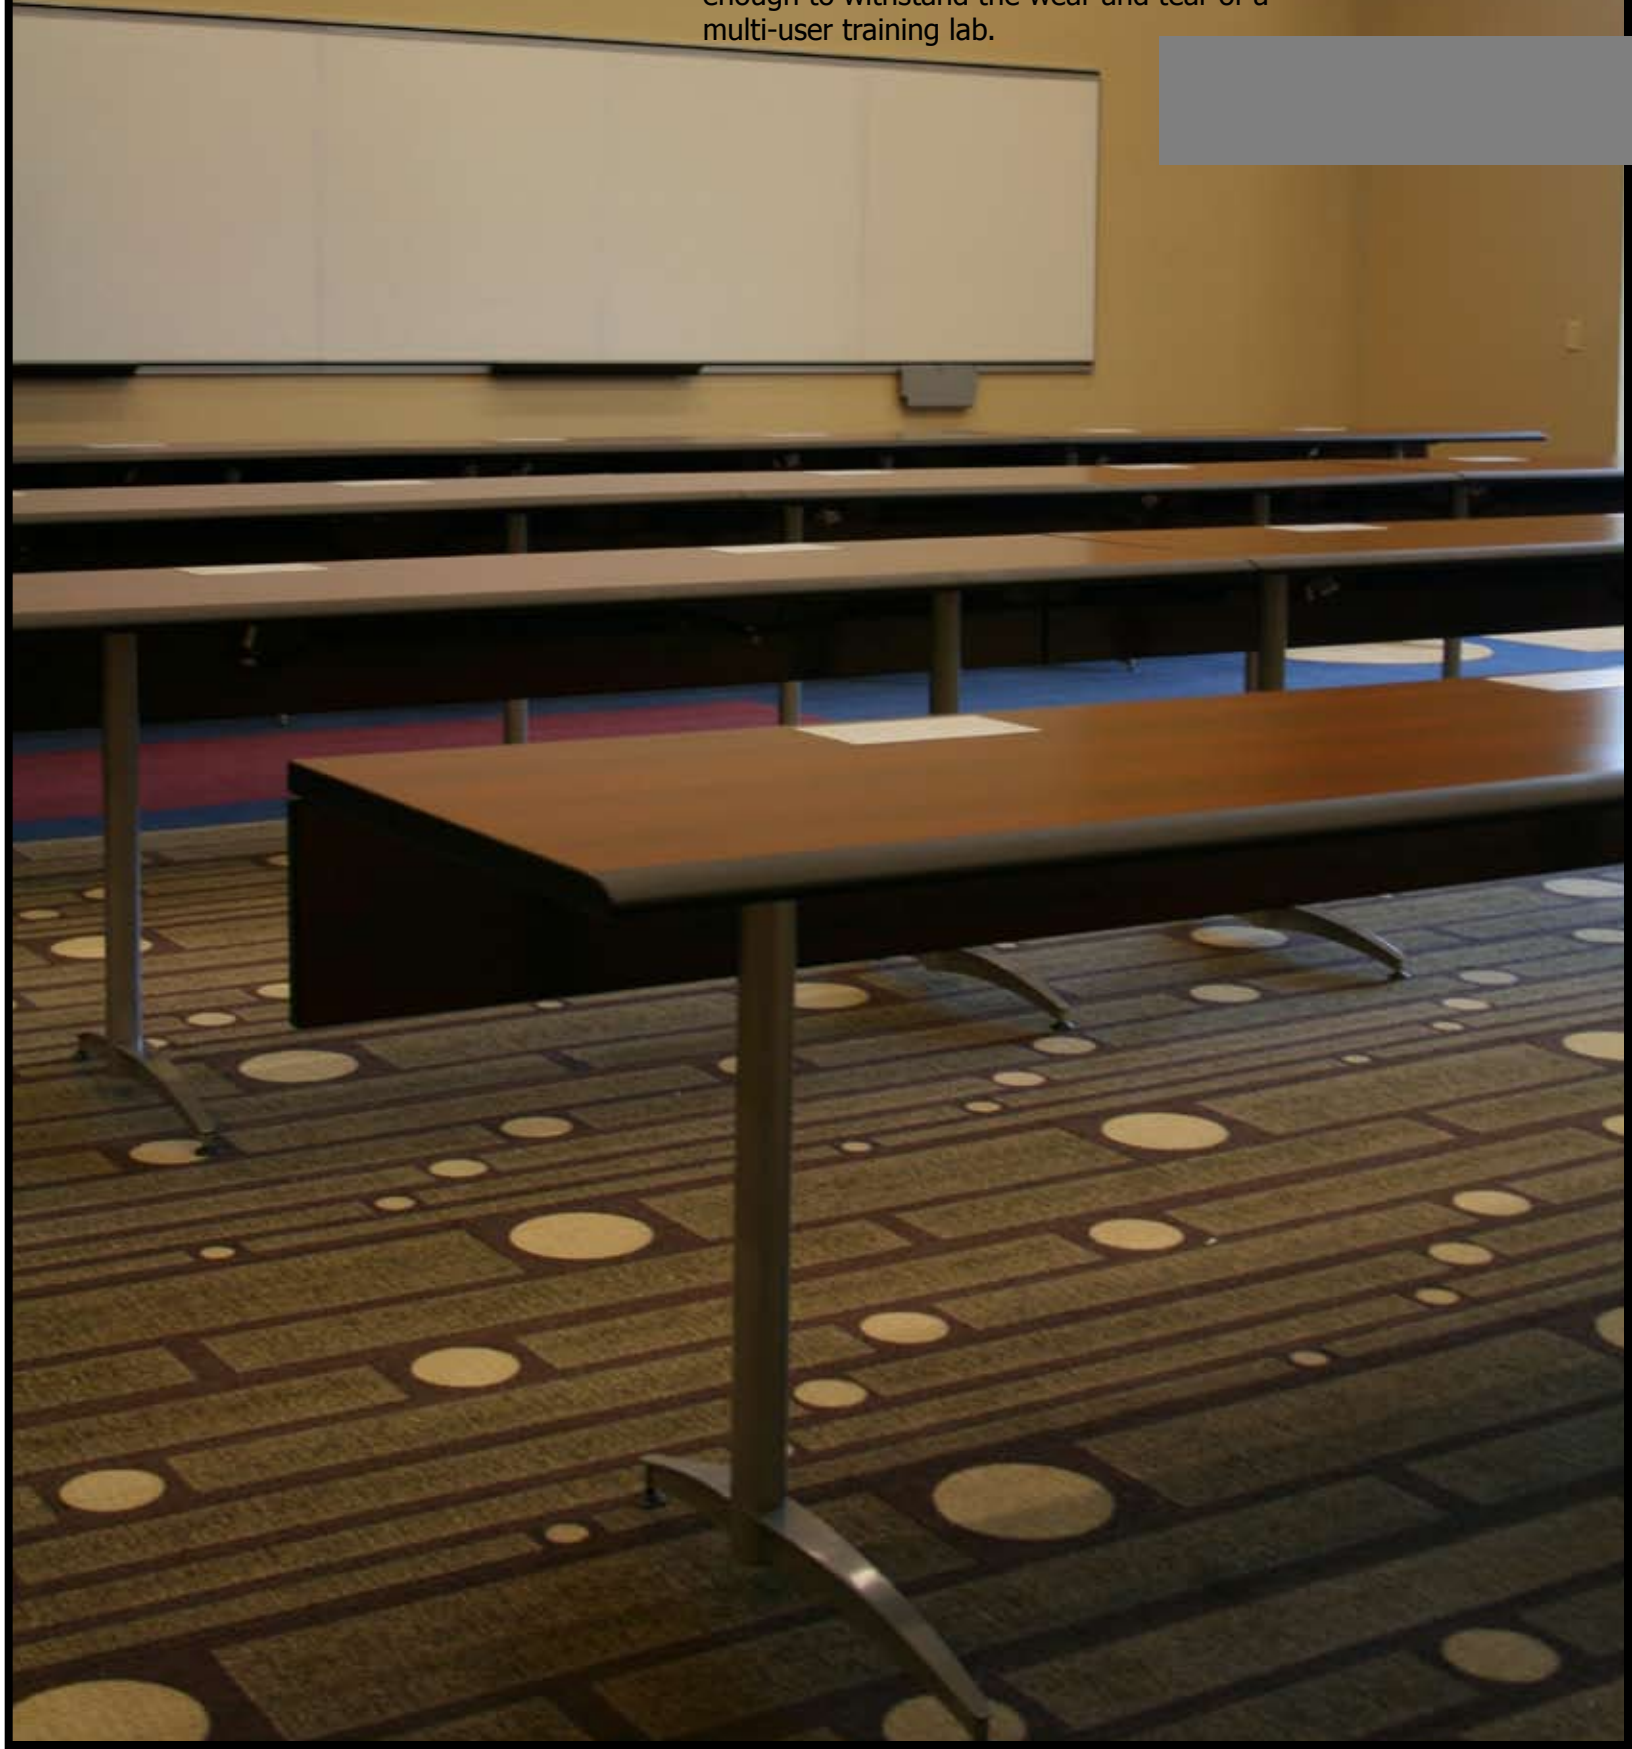

A sleek table base design complements the settings in both functional training rooms and elegant conference rooms at an affordable price. Computer labs, lunch rooms, and both large and small conference areas can be accommodated with the Elite Series.

The Elite Table Series provides multiple top shapes and sizes providing the user with solutions to any application. Laminate tops with 3mm PVC or wood edges or a thicker wood edge are available to top off the BIFMA tested bases. TableEx tables are durable enough to withstand the wear and tear of a multi-user training lab.

The nesting capabilities of this table series with a hinged modesty panel allow for easy reconfiguration and storage of training room tables. For a customized training facility, allow us to etch your company logo into the electrical plates.

Wire management and ganging components are features that aid in keeping conference rooms clean. TableEx fulfills the technology requirements of your educational and training rooms by offering a selection of electrical system and power component options. Please call TableEx with more specific requirements relevant to your needs and we will assist you with a hardwired or non-hardwired alternative.
