The new market

Sleek. Expressive. Fresh. Modern. Affordable. Customizable. These adjectives are commonly expressed when talking about the full-suite of Enwork tables and related products. Need technology? Got it. Want to carry common aesthetics throughout a space? No problem. Need it fast? Can do. Need a special quote in 24 hours? Done. Let's re-think and re-imagine solutions together.

Come In. Be inspired.

OASIS ABOVE
A great solution for customers who want flexibility. With separate telecom/audio/video choices you can customize a solution to meet all your needs. Oasis is 9" wide by 15" or 30" long. It is available in painted silver or black. Oasis is flush with the surface and has an integral lid which retracts into the table when opened.

ALEXANDER MIDDLE AND UPPER RIGHT (Single and Double) With its aluminum construction, Alexander offers a rich, modern aesthetic that fits any environment. Alexander (Single) comes with 2 receptacles and 2 data openings. Alexander (Double) comes with 4 receptacles and 4 data openings. A six foot power cord, 15 amp capability, and a voice/data adapter kit for customer-supplied jacks are included.

FLIP-N-GO ABOVE
Offering tremendous flexibility this product comes with a convenience outlet on the bottom of the unit which allows for additional attachments. The painted steel unit comes with a 6' cord, a telecom plate opening (specified separately), and a 15 amp, 125V circuit breaker for overload protection.

Conference table power and data. Let us design a solution for you.

TELECOM PLATES
For use with Foundation Trough Kits, Flip-n-Go Power or Oasis Power.

FLIP-N-GO RIGHT
Offering tremendous flexibility this product comes with a convenience outlet on the bottom of the unit which allows for additional attachments. The painted steel unit comes with a 6' cord, a telecom plate opening (specified separately), and a 15 amp, 125V circuit breaker for overload protection.

ASSEMBLE BELOW
A beautiful aluminum covered clamp-on power/data solution, it clamps onto any worksurface or table and offers 3 receptacles and 2 data openings. A six foot power cord, 15 amp capability, and a voice/data adapter kit for customer-supplied jacks are included.

VILLA ABOVE AND RIGHT
(Non-Sequential Daisy Chaining) Our #1 selling power and data solution, this unit comes in two versions: corded with convenience outlet on bottom or hardwired with 2-circuits. Each grommet is 3.3" x 5.5" and comes with 2 receptacles and two RJ-45 CAT6 punch-downs or just 2 receptacles.

Training table power and data. We've got you covered.

MINIPOINT BELOW
A great power and data solution for everyday needs. A fluid pop-up feature presents connections for your daily meetings. The 3" x 7" product comes standard with 2 receptacles and 2 data openings. A six foot power cord, 15 amp capability, and a voice/data adapter kit for customer-supplied jacks are included.

MINIPOINT ABOVE
(Sequential Daisy Chaining) Less expensive than non-sequential daisy chaining, this product allows you to connect multiple tables. Up to 8 Miniports may be connected in a sequential fashion. The first unit has a 10' power cord and 6' interlink cable. Color coded interlink cables provide a "dummy proof" connection methodology that ensures a safe electrical connection for all succeeding tables. Units 2 through 8 must be connected in a specific order.

POWERLEX BELOW
(Non-Sequential Daisy Chaining) Powerlex embedded in Impression offers 2 duplex receptacles, 4 data openings, a voice/data kit for customer-supplied jacks, 2 quick-connect jumper cables and enclosures. Building power is accessed via hardwire to the building followed by up to 12 units in any order.

ABOVE
Grid power is 3 circuit hardwired with ample data openings
